EXPERIENCE

Full Stack Developer · *Saayam For All*

San Jose, CA | Oct 2025 – Present

- Rebuilt the donor-facing Vue.js dashboard with real-time visibility into donations, recurring contributions, and financial reporting, cutting ops team time-to-insight.
- Created a library of reusable Vue.js components — filterable tables, multi-step forms, and charts — reducing feature dev time and onboarding friction for new contributors.
- Worked with backend engineers to define REST API contracts and resolve bottlenecks, improving frontend load speed and responsiveness across the platform.

Software Engineer Intern · *DentalScan*

Miami, FL (Remote) | Aug – Oct 2025

- Built React/TypeScript patient management dashboards with real-time appointment and lead tracking, and integrated Twilio and Retell AI for automated voice and SMS follow-ups.
- Added WebSocket sync so dashboards stayed live without page refreshes, improving day-to-day usability for high-volume clinic staff.
- Developed reusable React components, forms, and data tables while partnering with product and backend engineers to ship performant, production-ready features.

Software Engineer Intern · *LendAPI*

Irvine, CA (Remote) | Jun – Aug 2025

- Built a drag-and-drop loan application builder in React that let non-technical users configure and launch custom lending workflows without writing code.
- Delivered dynamic form components and an application management UI that streamlined loan origination and reduced onboarding time for new lenders.
- Partnered with product managers and backend engineers to ship scalable, production-ready features with consistent performance across the lending platform.

Software Engineer · *BusinessLab*

Mumbai, India | Aug 2022 – Jul 2023

- Developed React interfaces for an insurance platform — policy lifecycle dashboards, underwriting tools, and operational reporting — used daily by ops and underwriting teams.
- Architected reusable component libraries and REST API integrations across the platform, improving maintainability and reducing time-to-feature for the engineering team.
- Improved backend query performance with Django and PostgreSQL optimizations, increasing system reliability under production load.

Web Developer Intern · *Nibodh*

Mumbai, India | May – Oct 2019

- Built and shipped 10+ new features on a mobile-friendly React web app, growing the active user base to 5,000+ users.
- Integrated AWS S3 and Lambda to handle media storage and background processing, cutting data retrieval times by 30% and reducing administrative overhead by 25%.

PROJECTS

AI Portfolio Chatbot — *React, FastAPI, LangChain, OpenAI GPT-4, ChromaDB, Tailwind CSS*

- Designed a RAG-powered chatbot that answers questions about my portfolio using vector search over embeddings — with streaming responses and session memory for a natural, context-aware experience.
- Built NLP intent detection to route queries intelligently, ensuring the chatbot handles both structured lookups and open-ended questions without falling back to generic answers.

Emma – AI Therapist — *Next.js, TypeScript, Gemini Live API, Prisma, PostgreSQL, WebSockets, Vercel*

- Engineered a real-time voice therapy platform using Google Gemini Live and WebSockets, enabling seamless audio conversations with session history persisted across visits.
- Implemented auth and a Prisma/PostgreSQL backend to support multi-user sessions at scale, with deployment on Vercel for fast, global access.

SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL

Frontend: React.js, Vue.js, Next.js, HTML5, CSS3, Tailwind CSS, Responsive Design, Component Architecture, State Management

Backend: FastAPI, Django, Node.js, Express.js, REST APIs, WebSockets

Databases: PostgreSQL, MongoDB, Redis

AI & Integrations: OpenAI API, LangChain, Google Gemini Live, Retell AI, Twilio, Swagger/OpenAPI

Cloud & DevOps: AWS (S3, Lambda), Docker, Kubernetes, Jenkins, CI/CD, Git

EDUCATION

M.S. in Computer Science · *California State University, Fullerton*

Aug 2023 – May 2025

Relevant Coursework: Advanced Algorithms, Distributed Systems, Artificial Intelligence, Object-Oriented Programming
